

NORTH SOMERSET LEVELS INTERNAL DRAINAGE BOARD
LAND DRAINAGE ACT 1991
NOTICE TO FARMERS AND RIPARIAN OWNERS

Farmers and landowners with land adjoining the following 'Viewed Rhyne' watercourses are advised that the 2017 Flood Defence aquatic weed-cutting operations will take place broadly in accordance with the following programme. Flailing of watercourse banks will normally be necessary and this may take place several days before the weed-cutting work. All works will be undertaken in accordance with the Board's Conservation Policy and Best Practice Guidelines. Riparian owners are reminded that in accordance with the Board's Byelaws (2011) a 9-metre wide strip of land from the top of the bank should be kept clear for access and maintenance purposes. This particularly applies where land has been sub-divided to form small 'pony paddocks'. The Board has legal right of entry, whilst efforts are made to minimise damage to crops it may not be possible to interrupt or delay the programme to avoid harvesting operations, as the Board's contractor follows well-established operational routes for maximum efficiency. Variance on the dates stated below may occur depending on adverse weather and ground conditions.
